Single Line, Marsh Junction to Radstock Station worked by Electric Train Token Marsh Junction to Pensford, and Electric Train Staff Pensford to Radstock, the Staff Stations and crossing places being Marsh Junction, Pensford, Pensford and Bromley Siding, Clutton, Hallatrow, and Radstock Station.

Electric Train Token worked between Clutton and Pensford when Pensford and Bromley Siding is out of circuit.

†Pensford and Bromley Siding is only available for shunting a light Engine, or Freight Train (at Old Mills short Freight Train only can be shunted), for a train to pass in the same or opposite direction.

Double Line, Radstock Station to Mells Road South End.

Single Line, Mells Road South End to Frome worked by Electric Train Token, Mells Road and Frome South Box being the Token Stations.

FROME, RADSTOCK AND BRISTOL.

CLEVEDON BRANCH.

Single Line worked by a Train Staff and one engine in steam at a time or (b) by Train Staff and two engines in steam coupled together, or (c) by Train Staff and one engine coupled to Rail Motor Car or a second engine coupled to an Auto Car. The Train Staff Stations are Yaton and Clevedon.

[illegible]

YATTON, WELLS AND WITHAM.

Single Line worked by Electric Train Staff. Intermediate Crossing Places : Craunmore, Shepton Mallet, Wells (East Somerset) †Wells (Tucker Street), Wookey† Lodge Hill†, Cheddar, Axbridge, Sandford†, and Congresbury.

↑—Wells (East Somerset), Wookey, Lodge Hill and Sandford are only available for crossing two Freight Trains or a Freight and Passenger Train, but in no case may a Passenger Train be put into the Siding at either place for another train to pass. Only a short Freight Train can be shunted at Wookey, and a Freight Train of 28 trucks, exclusive of engine and van, can be shunted at Lodge Hill for another train to pass. The line from Witham to Wells is Down and from Wells to Yatton is Up and vice-versa.

WEEK DAYS.

[illegible]

WEEK DAYS:

[illegible]

S.R. train on Saturdays until 6.30 a.m. Mondays, also when any W.R. early or late train is run on other days. †—From
Highworth Junction.
L—Closed after 12.20 a.m. Freight from Portishead has cleared.

MAXIMUM SPEED OF TRAINS THROUGH JUNCTIONS AND AT SPECIFIED PLACES.

IMPORTANT.—The speed of trains must not exceed 75 miles per hour AT ANY PLACE except where specially authorised.

Inspectors, Signalmen, and others must report to their Superior Officer every case in which trains run in excess of the speed limits shewn below, and full particulars must be forwarded at once to the Divisional Superintendent.

NOTE.—The speed of all Light Engines or Trains ENTERING or LEAVING all Bay, Engine, Carriage, Avoiding Lines and Goods Loop JUNCTIONS must be restricted to 10 miles an hour except where restricted to a lower speed in the following list or elsewhere.

EXCHANGING TRAIN STAFF AND TICKETS.—At all Stations and places where Train Staff or Tickets have to be exchanged by hand, the speed of Trains not booked to stop must be reduced to 10 miles per hour when passing the Signalmen.

At all Stations and places where the Electric Train Staff Exchange Apparatus is provided the speed of the Train must in no case exceed 15 miles per hour when passing the Apparatus.

Diesel Cars must stop to exchange Train Staff.

Signalmen and others must report any case in which the speed laid down in these instructions is exceeded.

WORKING OF ENGINES IN STEAM COUPLED TOGETHER

MAIN LINE ROUTES.

General instructions relative to the double-heading of engines in steam are given on page 142 of the General Appendix to the Book of Rules and Regulations, dated August 1st, 1936.

On all routes authorised for 60XX "King" Class engines (except the goods loops scheduled for use in emergency by a "King" class engine singly at a maximum speed of 5 m.p.h.), two "King" class engines may run coupled together, or may be assisted by any other Western Region engine, subject to the following regulations:—

- (1) When any tender engine is run coupled to a "King" engine, they must not be coupled funnel to funnel.
- (2) When a tank engine in the "red" or "blue" group assists a "King" engine, the tank engine must be coupled to the tender of the "King" engine.
- (3) Not more than one engine may be coupled to a "King" engine without special authority.
- (4) The foregoing permissions are subject to the observance of the special overall speed restrictions laid down on certain routes as applicable to the working of a "King" class engine singly.

ROUTES OTHER THAN MAIN LINES.

On the sections of the Western Region not dealt with in the Main Line route instructions, not more than two engines in steam of the appropriate types in the group or groups authorised to work may be coupled together and worked at customary speeds, except in those cases where special regulations are laid down to govern the working of engines in steam coupled together on the section of line concerned. These cases form the subject of local instructions, and the speed limitations, where specified, must be strictly adhered to.

SWINDON SHED AND SWINDON FACTORY.

Subject to speed not exceeding twenty miles per hour, any group of not more than three engines (with the exception of the 60XX ("King") Class—worked separately), may be worked coupled together between these points.

ENGINE RESTRICTIONS

STEVENTON TO WOOTTON BASSETT JUNCTION. (Route Colour—Double Red.)

Permitted Engines.—All classes (except 61XX between Swindon and Wootton Bassett Junction), subject to the following restrictions:—

60XX ("King") Class engines may work only over Main and Relief Lines. They must not use any Sidings except in Locomotive Yards, but they may work over Crossover Roads between Main Lines and Relief Lines and Sidings adjacent to Main or Relief Lines as far as catchpoints only for the purpose of putting off vehicles, etc., in cases of emergency. These engines must not work into any Goods Running Loop with the exception of the following, and these may be used when working Passenger Trains in cases of emergency only, the speed not to exceed five miles per hour.

ENGINE RESTRICTIONS—continued.

PATCHWAY TO SEVERN TUNNEL JUNCTION. (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King"), 61XX and 47XX Classes.

YATE BRANCH AND WESTERLEIGH LOOP. (Route Colour—Dotted Red.)

Permitted Engines.—All classes except 60XX ("King"), 61XX and 47XX Classes, subject to a speed restriction of twenty miles per hour for all "Red" Group engines.

STAPLETON ROAD TO AVONMOUTH DOCK (via Clifton Down). (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King"), 61XX and 47XX Classes, subject to the following restriction:—

"10XX Class engines not to exceed a speed of sixty miles per hour."

LOCAL RESTRICTIONS.

STATION.	CONNECTIONS AND SIDINGS.	ENGINES PROHIBITED.
Montpelier	Coal Yard over Bridge No. 5	Heavy engines not to work into Coal Yard over Bridge No. 5. L.M.R. Engines Class 4 (0-6-0), Freight Tender (Diagram 167), Class 5 (2-6-0), Mixed Traffic Tender (Diagram 180) and Class 5 (4-6-0) Mixed Traffic Tender (Diagram 178) may work into Montpelier Coal Yard at "dead slow" speed over Bridge No. 5.

FILTON JUNCTION AND STOKE GIFFORD JUNCTION TO FILTON WEST JUNCTION. (Route Colour—Double Red.)

Permitted Engines.—All classes (except 61XX), subject to the following restrictions:—

60XX ("King") Class engines may work only over Main and Relief Lines. They must not use any Sidings except in Locomotive Yards, but they may work over crossover roads between Main Lines and Relief Lines and Sidings adjacent to Main or Relief Lines as far as catchpoints only, for the purpose of putting off vehicles, etc. in cases of emergency.

These engines must not work into any Goods Running Loops.

FILTON WEST JUNCTION TO AVONMOUTH DOCK (via Henbury). (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King"), 61XX and 47XX Classes.

LOCAL RESTRICTIONS.

STATION.	CONNECTIONS AND SIDINGS.	ENGINES PROHIBITED.
Henbury	Sidings and Back Road	78XX, 29XX, 40XX, 39XX, 49XX, 59XX, 69XX, 4073, 50XX, 70XX, 68XX, 10XX Classes.
Henbury	Cattle Pen and Mileage Sidings	Diesel Cars.
Hallen Marsh Junction	National Smelting Works Sidings	Diesel Cars.

HALLEN MARSH JUNCTION TO PILNING JUNCTION. (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King"), 61XX and 47XX classes, subject to the following restriction:—

"All 'Red' Group engines must not exceed a speed of fifteen miles per hour."

BRISTOL EAST DEPOT AND NORTH SOMERSET JUNCTION TO BRISTOL WEST (via St. Philip's Marsh) (BRISTOL RELIEF LINE.) Route Colour—Double Red.

Permitted Engines.—All classes (except 61XX), subject to the following restrictions:—

60XX "King" Class engines must not exceed a speed of twenty miles per hour.

These engines may work only over Main and Relief Lines. They must not use Sidings except in Locomotive Yards, but they may work over Crossover Roads between Main Lines and Relief Lines and Sidings adjacent to Main or Relief Lines as far as Catchpoints only for the purpose of putting off vehicles, etc., in cases of emergency. These engines must not work into any Goods Running Loop.

LOCAL RESTRICTIONS.

STATION.	CONNECTIONS AND SIDINGS.	ENGINES PROHIBITED.
Bristol West	Siding at rear of Bath Road Loco. to Turntable.	60XX.
St. Philip's Marsh Goods	All Mileage and Goods Sidings Junctions to Nos. 6 and 7 and Robinson's..	78XX, 29XX, 40XX, 39XX, 49XX, 59XX, 69XX, 47XX, 4073, 50XX, 70XX, 68XX and 10XX Classes.

ENGINE RESTRICTIONS—continued.

NORTH SOMERSET JUNCTION TO DR. DAY'S BRIDGE JUNCTION (Bristol Loop). (Route Colour—Double Red.)

Permitted Engines.—All classes except 6LXX.

RELIEF LINES NORTH SOMERSET JUNCTION TO BRISTOL EAST DEPOT. (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King") and 6LXX Classes.

BRISTOL (TEMPLE MEADS) TO WAPPING WHARF. (Route Colour—Red.)

Permitted Engines.—All classes except 60XX ("King"), 6LXX and 47XX Classes.

LOCAL RESTRICTIONS.

STATION.	CONNECTIONS AND SIDINGS.	ENGINES PROHIBITED.
Bristol (Temple Meads) Goods ..	All Waterside and Shed Roads No. 1 Harbour Road, High Level	78XX, 29XX, 40XX, 39XX, 49XX, 59XX, 69XX, 47XX, 4073, 50XX, 70XX, 68XX, 10XX Classes.
Redcliff Wharf	Nos. 3, 4 and 5 Sidings	
Wapping Wharf	No. 5 Siding to Chard's Junction opposite St. Raphael's Church Junction to Coal Road Junction to Quayside Warehouse	78XX, 29XX, 40XX, 39XX, 49XX, 59XX, 69XX, 47XX, 4073, 50XX, 70XX, 68XX, 10XX Classes.
Wapping Wharf	Line adjoining the Quayside	
		All engines.

WAPPING WHARF JUNCTION TO ASHTON BRIDGE JUNCTION. (Route Colour—Uncoloured.)

Permitted Engines.—All uncoloured engines, 2251 and 4500 to 4574 "Yellow," and 57XX "Blue" Classes.

LOCAL RESTRICTIONS.

STATION.	CONNECTIONS AND SIDINGS.	ENGINES PROHIBITED.
Cumberland Sidings	All Sidings	2251 and 57XX Classes.
Ashton Swingbridge	Corporation Cattle Pens	Engines with Outside Cylinders.

ASHTON JUNCTION TO CANONS MARSH. (Route Colour—Uncoloured.)

Permitted Engines.—All uncoloured engines, 2251 and 4500 to 4574 "Yellow," and 57XX "Blue" Classes.

BRANCHES.

SECTION OF LINE.	GROUP COLOUR.	ENGINES AUTHORISED.	LOCAL PROHIBITIONS.
Faringdon Branch ..	"Uncoloured"	"Uncoloured" engines without outside cylinders.	—
Highworth Branch ..	"Uncoloured"	"Uncoloured," 517, 3571, 14XX, 58XX Classes. 36XX, 37XX, 46XX, 57XX, 67XX, 77XX, 87XX, 96XX and 97XX "Blue" Group engines may work between Highworth Junction and South Marston Factory and Up Side Sidings at 0m. 28ch. 45XX and 55XX, "Yellow" Classes may work between Highworth Junction and No. 4 Supply Reserve Depot and Up Side Sidings at 0m. 28ch.	No. 4 Supply Reserve Depot. 36XX, 37XX, 46XX, 57XX, 67XX, 77XX, 87XX, 96XX, 97XX, 45XX, 55XX, 14XX and 58XX Classes not to pass Water Column at Highworth Junction end of low platform adjoining No. 4 Siding. Highworth Goods Shed. 14XX and 58XX Classes not to pass beyond Shed at loading bank end.
Malmesbury Branch ..	"Uncoloured"	All "Uncoloured" engines.	—
Calne Branch	"Yellow"	"Uncoloured" and "Yellow" engines.	Black Dog Loading Bank. "Yellow" Group engines not to work into Black Dog Loading Bank Siding.
Radstock Branch (Marsh Junction to Frome).	"Dotted Blue"	"Uncoloured," "Yellow" and "Blue" Classes subject to the following restrictions:— All "Blue" engines not to exceed speed of twenty-five miles per hour at any place on Branch, and 78XX engines must not exceed five miles per hour alongside Up and Down Platforms at Mells Road.	Pensford. 28XX, 38XX, 48XX, 30XX, 26XX "Austerity," 41XX, 51XX, 81XX, 45XX, 55XX, 43XX, 53XX, 63XX, 73XX and 78XX Classes not to enter Goods Shed Siding and Up Dock. Clutton. 28XX, 38XX, 48XX, "Austerity," 43XX, 53XX, 63XX and 73XX Classes not to enter Goods Lock up Siding. Hallatrow. 28XX, 38XX, 48XX, 30XX, 41XX, 51XX, 81XX, "Austerity," 26XX, 43XX, 53XX, 63XX, 73XX, 45XX, 55XX, and 78XX Classes not to enter Cattle Pen Siding.

ENGINE RESTRICTIONS—continued.

BRANCHES—continued.

SECTION OF LINE.	GROUP COLOUR.	ENGINES AUTHORISED.	LOCAL PROHIBITIONS.
Radstock Branch (Marsh Junction to Frome).—continued.			Old Mills. 78XX Class not to enter Two Sidings, Frome end, and Outer Siding, Bristol end. Radstock. 26XX, 28XX, 38XX, 48XX, 41XX, 51XX, 81XX and 2-8-0 R.O.D. engines not to enter Siding in Yard. 26XX, 28XX, 38XX, 48XX, 41XX, 51XX, 81XX, 43XX, 53XX, 63XX, 73XX and 2-8-0 R.O.D. Classes not to enter Up Loading Dock Siding. 45XX, 55XX Classes not to enter Engine Shed. Mells Road. 78XX Class not to enter Down Side Stone Loading Dock, and must not exceed five miles per hour alongside Up and Down Platforms. Frome. 78XX Class not to enter Market Siding, Timber Stage, Bristol end. 19XX, 20XX, 36XX, 37XX, 46XX, 57XX, 67XX, 77XX, 87XX, 96XX, 97XX Classes are the only engines allowed to work into the Somerset Quarry Siding. 19XX, 20XX, 2301, 2251 Classes are the only engines allowed to work into the Dairy Siding. Diesel Cars must not enter Up Bay Platform.

Working of Engines in Steam Coupled Together. (Radstock Branch.)

Tender engines authorised to work over this Section may work double-headed with chimneys facing the same direction. The unmentioned Tank engines may work double-headed over the River Avon Bridge at 22m. 70ch., subject to a speed restriction of not more than fifteen miles per hour:—

- Two "Yellow" engines.
- A "Yellow" and "Uncoloured" engine.
- Two "Uncoloured" engines.
- All other combinations prohibited.

Portishead Branch ..	"Dotted Red," Parson Street Junction and West Loop South Junction to Clifton Bridge. "Yellow" Clifton Bridge to Portishead.	Parson Street Junction and West Loop South Junction to Clifton Bridge. All classes except 60XX ("King"), 61XX, and 47XX. All "Red" engines not to exceed twenty miles per hour between Parson Street Junction and West Loop South Junctions and Clifton Bridge. Clifton Bridge to Portishead. "Uncoloured" and "Yellow" engines, 57XX.	Ashton Sawmills Siding. All engines not to work into Sidings in Timber Yard beyond the road Level Crossing. Clifton Bridge. Great care to be exercised in working 78XX, 29XX, 40XX, 39XX, 49XX, 59XX, 69XX, 4073, 50XX, 70XX, 68XX, 10XX Classes into Down Side Loading Bank Portishead end of Station.
Clevedon Branch ..	"Dotted Red"	All classes except 60XX ("King"), 61XX and 47XX Classes. All "Red" engines not to exceed a speed of twenty miles per hour.	
Blagdon Branch ..	"Uncoloured"	"Uncoloured" engines ..	
Wells Branch (Yatton to Wirtham),	"Dotted Blue"	"Uncoloured" and "Yellow" Classes. "Blue" engines in 43XX, 53XX, 63XX, 73XX and 78XX Classes subject to the following restrictions:— 43XX, 53XX, 63XX, 73XX Classes:— Speed not to exceed twenty-five miles per hour over bridge at 24m. 40$\frac{1}{2}$ch. near Axbridge.	Congresbury. 78XX Class not to work into Goods Shed Road. Sandford and Banwell. 78XX Class not to work into:— Goods Shed Road. Loading Bank Road. Mileage Siding. Quarry Side, past gate.

ENGINE RESTRICTIONS—continued.

BRANCHES—continued.

SECTION OF LINE.	GROUP COLOUR.	ENGINES AUTHORISED.	LOCAL PROHIBITIONS.
Wells Branch (Yatton to Witham)—cont.		78XX Class :— Speed not to exceed twenty-five miles per hour at any place on Branch. Speed not to exceed five miles per hour alongside Congresbury Down Platform.	Axbridge. 78XX Class not to work into Goods Shed Road and Cattle Pen Roads. Cheddar. 78XX Class not to work into Goods Shed Road. Draycott. 43XX, 53XX, 63XX, 73XX and 78XX Classes not to work into Truck Turntable. Lodge Hill. 78XX Class not to work into :— Goods Shed Road. Dead End Siding 4 chains ahead of Junction to Stops. Wookey. 43XX, 53XX, 63XX, 73XX and 78XX Classes must not work into Sidings. Wells (Tucker Street). 43XX, 53XX, 63XX, 73XX and 78XX Classes not to work into :— Goods Shed Road. Straight Road between Goods Shed and Main Line. Wells (East Somerset). 43XX, 53XX, 63XX, 73XX and 78XX Classes not to work into any Yard Sidings except Up Loop. Shepton Mallet. 43XX, 53XX, 63XX, 73XX and 78XX Classes not to work over :— Last 4 chains of Up Outer Siding. Cattle Pen Road from Main Line and past pens. Cranmore. 43XX, 53XX, 63XX, 73XX and 78XX Classes not to work into Cattle Pen and No. 1 Road. 43XX, 53XX, 63XX, 73XX, 45XX, 55XX and 78XX Classes not to work into :— Doulting Siding. Mendip Mountain Quarries Siding. Merehead Quarry Siding. 78XX Class not to work into this Siding. Wanstrow. 43XX, 53XX, 63XX, 73XX, 45XX, 55XX and 78XX Classes not to work into Cattle Pen Road.

Working of Engines in Steam Coupled Together. Yatton to Witham (Wells Branch).

43XX, 53XX, 63XX, 73XX and 78XX Classes must not be double-headed or assisted.

WORKING OF ENGINES OVER L.M.R. BETWEEN YATE JUNCTION AND STANDISH JUNCTION.

Western Region engines of the following types may work over the L.M.R. Main Running Lines between Yate Junction and Standish Junction. They must not, however, be allowed to run on to the Siding over the Coal Shoots at Charfield :—

Type.	Classes.
0-6-0 T	36XX, 37XX, 46XX, 57XX, 67XX, 77XX, 87XX, 96XX, 97XX.
2-8-0	28XX, 30XX.
2-6-2 T	3150, 51XX, 45XX, 55XX.
4-6-0	29XX, 49XX, 59XX, 69XX, 68XX, 78XX, 40XX, 4073, 50XX, 70XX, 10XX.
2-6-0	26XX, 43XX, 53XX, 63XX, 73XX, 93XX.
4-4-0	33XX, 34XX.
2-8-0 T	42XX, 52XX.
2-8-2 T	72XX.
0-6-2 T	56XX, 66XX.

10XX class engines may work through Crossover Roads and Connection between platforms or adjacent to structures and over Loop Lines between Yate South Junction and Gloucester Tramway Junction.

* 0-6-0 Tender Engines in Classes 2251 and 23XX may work between Gloucester (Tramway Junction) and Yate South Junction and over the London Midland Region Lines between Yate South Junction and Bristol East. The shoe of the A.T.C. apparatus may be left in the operative position throughout between Gloucester and Bristol.

ENGINE RESTRICTIONS—continued.

WORKING OF L.M.R. ENGINES OVER W.R. LINE BETWEEN GLOUCESTER AND BRISTOL VIA THE SEVERN TUNNEL IN CASES OF EMERGENCY.

The undermentioned types of L.M.R. engines may be allowed to work in case of emergency over running lines between Gloucester and Bristol via Severn Tunnel Junction, subject to the observance of the usual speed restrictions and to the additional conditions below in respect of the two types of engines marked with an asterisk:

*Standard Class 5X 4-6-0 passenger.

*Standard Class 5P 2-6-0 Freight.

*Speed not to exceed 40 m.p.h. between Severn Tunnel Junction and Patchway, and pending reconstruction, speed to be reduced to 5 m.p.h. when passing over following bridges:

9m. 28½ c. } On Bristol side of Pilning station.
9m. 1½ c. }

Standard Class 4 4-4-0 passenger (compound).

Standard Class 3 4-4-0 passenger.

Standard Class 2 4-4-0 passenger.

Standard Class 5P 4-6-0 mixed traffic.

Standard Class 8 2-8-0 freight tender.

Standard Class 7 0-8-0 freight tender.

Standard Class 4 0-6-0 freight tender.

Standard Class 5P 2-6-0 freight tender.

Ex Mid. class 3 0-6-0 freight tender.

WORKING OF L.M.R. 2-6-0 CLASS 2.F. ENGINES—DIAGRAM E.D. 273.

The above-mentioned engines are authorised to work between Paddington and Newport via Severn Tunnel and via Gloucester.

WORKING OF L.M.R. ENGINES BETWEEN BRISTOL (T.M.) WEST AND WESTON-SUPER-MARE.

Subject to the observance of service restrictions, the following engines may be employed for through working from Bristol (T.M.) West to Weston-super-Mare:—

Standard Class 5	..	..	4-6-0 mixed traffic engine (Diagram 178 M).
Standard Class 5	..	..	2-6-0 freight traffic engines, parallel and taper-boiler types (Diagrams 180A and *181 C).
Standard Class 4	..	..	4-4-0 passenger tender engine (Compound) (Diagram 73 B).
Standard Class 4	..	..	0-6-0 freight tender engine (Diagram 167 B).
Ex Midland Class 3	..	..	4-4-0 passenger tender engine (Diagram 60 B).
Standard Class 2	..	..	4-4-0 passenger tender engine (Diagram 69 C).
Standard Class 6 P	..	..	4-6-0 passenger tender engine (Diagram *270 B).
Standard Class 5 XP	..	..	4-6-0 passenger tender engine, taper boiler (Diagram *176 L).
Standard Class 5 XP	..	..	4-6-0 passenger tender engine, parallel boiler (Diagram *173 E).
Standard Class 6 P	..	..	4-6-0 Passenger tender engine (Diagrams *269 B and *272).

Engines marked * are subject to a maximum speed of 20 miles per hour over the Weston-super-Mare Loop.

WORKING OF L.M.R. ENGINES ON FREIGHT TRAINS.

Certain London Midland Region engines, as shown below, have been authorised for the general working of Freight Trains over the following sections of line subject to the restrictions indicated:—

Engines Authorised:—

Class 3 (0-6-0) Freight Tender (ex Midland)	..	..	..	..	..	..	Diagram No. 165
Class 4 (0-6-0) Freight Tender (Standard)	..	..	..	..	..	..	Diagram No. 167
Class 4 (2-6-0) Freight Tender (Standard)	..	..	..	..	..	..	Diagram No. 274
Class 5 (2-6-0) Freight Tender—Parallel Boiler	..	..	..	..	..	..	Diagram No. 180
Class 5 (4-6-0) Mixed Traffic Tender	..	..	..	..	..	..	Diagram No. 178

Restrictions.

Engines on Diagram No. 178 restricted as follows:—

Dr. Day's Bridge Sidings	..	..	No. 2. Siding prohibited.
Lawrence Hill	..	..	Nos. 2, 3 and 6 to 11 Sidings and No. 4. Sidings past clearance point prohibited.
Stapleton Road	..	..	Back Road and No. 4 Road prohibited.
Filton Junction	..	..	No. 1 Shed Road and No. 3 Mileage Road prohibited.

WORKING OF ENGINES OVER THE SEVERN BRIDGE. SEVERN AND WYE SECTION.

Only engines bearing the following numbers are permitted to work over the Severn Bridge:—

WESTERN REGION ENGINES:—

Class 2301 (0-6-0) tender (non-condensing type) bearing numbers 2322 to 2356, 2382 to 2484, and 2513 to 2579.
Classes 2021 (0-6-0) tank, 7400 (0-6-0) tank, 1400 (0-4-2) tank.

L.M.R. ENGINES:—

Class 1.P. (2-4-2) tank. (L.N.W. 5-ft. 6 in.).	Class 2.F. (0-6-0) tender. (L.N.W. Small Coal.)
Class 2.P. (2-6-2) tank. (Standard.)	Class 2.F. (0-6-0) tender. (L.N.W. 18-in.).
Class 2.F. (0-6-2) tank. (L.N.W., S.T.C.).	Class 2.F. (0-6-0) tender. (Midland bearing numbers 2987 to 3127, 3695 and 22900 to 22984.
Class 2.F. (2-6-0) tender. (Standard.)	

Trains running over the Severn Bridge must not be worked by more than one engine in front.

Two engines coupled together must not in any circumstances be run over the bridge.

LIGHT ENGINES RETURNING TO SOUTH WALES AREA (G.33038).

Any number of engines (excluding 4-6-0 "King" Class) may run in steam coupled together over the undermentioned routes, subject to observance of the reservation specified below:

(a) Paddington to Severn Tunnel Junction, via Badminton.

(b) Paddington to Severn Tunnel Junction, via Gloucester.

On any group of more than two engines speed must be reduced to 10 m.p.h. when passing over River Severn Bridge at Over Junction.

Engines must run from Lydney to Severn Tunnel Junction in pairs only, passing over Chepstow River Bridge under the special conditions operative in respect of working coupled engines over this bridge.

ENGINES OF OTHER REGIONS COUPLED TO W.R. ENGINES.

For instructions, see page 108 of the General Appendix to the Rule Book.

GENERAL STIPULATION.

Engines must not enter Sidings beyond the point at which Stop Boards are erected.

INSTRUCTIONS FOR CALCULATING LOADS OF FREIGHT TRAINS.

- (1) The maximum "engine" and "working" loads applicable to the lines referred to in this sectional time table are shown on pages 349 to 355.
- (2) Loaded wagons will bear labels overprinted with the numerals 1 (coal, coke, or patent fuel), 2 (other minerals), 3 (general merchandise), and guards, to arrive at the load of a train, must ascertain the number of wagons of each class of traffic, or empty wagons to be conveyed. Wagons conveying empty containers to be counted as loaded Class 3 wagons.
- (3) In order that due allowance may be made for certain heavy traffics in Classes 2 or 3, any wagons (except pitwood), although bearing Class 2 or 3 labels, which are carrying contents weighing 7 tons or over, must be calculated as Class 1 for train loading. Such wagons must, however, be entered on the guards' journals in the same columns as the number overprinted on the label.
- (4) Examples of traffics in Classes 2 or 3, which must be calculated as Class 1 are:

Ammunition in full train loads.	Granite, Gravel, Lime, Ironstone, Metal Sheets, Pig Iron, Rails,	Roadstone, Sand, Steel Bars, Tarmac. Tinplates.
Ballast, Bricks, Cement, China Clay, China Stone, Copper, Dolomite,		
- (5) Ammunition not in full train loads (see above), Pitwood, Cogwood, and Sugar Beet Traffic bearing Class 3 labels, must, for loading purposes, be calculated as Class 2 Traffic.
- (6) The maximum and working loads shown on pages 349 to 355 apply (with a few exceptions specially indicated) to ordinary freight wagons. Wagons of larger dimensions must be calculated as under:

WHEN LOADED.

Five 12 and 13- tonners = 6 } Class 1, 2 or 3 according
 Two 15/16-tonners .. = 3 } to traffic involved.
 Two 40-tonners .. = 7 }

WHEN EMPTY.

Three 15/16-tonners = 4 }
 One 40-tonner .. = 3 } Ordinary empty wagons.
 8, 10, 12 or 13- }
 tonners .. = 1 }

Hopper or flat vehicles not provided with Coke Rails when loaded with coke to be counted as under for engine load purposes:

10 and 12-ton Vehicles.

As one 10-ton loaded Class 2 traffic.

14-ton Vehicles.

3-4 10-ton wagons when loaded

To be treated as 12-ton wagons when empty.

Note.—Wagons of 20, 21 and 22-ton capacity are shown in special tables on page 341.

15-ton Vehicle.

As one 10-ton loaded Class 1 traffic.

20-ton Vehicle.

As one 12-ton loaded Class 1 traffic.

- (7) Special class wagons, such as "Crocodiles," "Boralls," "Oil Tanks," etc., when loaded and empty are to be calculated as shown in table on pages 342 and 343.
- (8) Mixed loads should be calculated upon the basis of the traffic which forms the greatest proportion of the train, e.g.:

A Train composed of.	Traffic forming greatest proportion of train.	Equivalent load of train in Class 3 Traffic.
10 wagons Class 1 5 wagons Class 2 25 wagons Class 3 4 empty wagons	Class 3	10 wagons Class 1 equal 15 Class 3 5 wagons Class 2 equal 6 Class 3 25 wagons Class 3 equal 25 Class 3 4 empty wagons equal 3 Class 3 Total 49 Class 3

- (9) A Ready Reckoner is given on page 343 for calculating Mixed Loads.
- (10) With certain exceptions all engines are classified into five Groups—A, B, C, D and E. The Group letter is painted in a circle on both sides of the engine, just above the engine number. The increased loads in Class 3 traffic authorised for engines of the 43XX, 78XX, 29XX, 49XX, 59XX, 40XX, 68XX, 47XX, and "Castle" types in the Table shown on page 351 of this Service Book are applicable only when such engines are working "C" and "D" Head Lamp Freight Trains timed at standard point-to-point allowances.
- (11) Class 1 and 2 traffic; Class 3 traffic enumerated in paragraph 4 (former private owners' wagons fitted with grease axle-boxes, and Tanks (except as provided for in General Appendix dated August 1st, 1936) must not be conveyed by Freight Trains carrying "C" Headlamps.
- (12) Class 1 and 2 Traffic, former Private Owners' Wagons fitted with grease axle-boxes and Tanks (except as provided for in General Appendix dated August 1st, 1936) must not be conveyed by Freight Trains carrying "D" Headlamps.
- (13) In addition to the foregoing, when calculating the load of Freight Trains allowance must be made for all wagons which are longer than ordinary wagons, i.e. exceeding 21 feet over buffer, and train advices must include the following information:—
 - (a) Total number of wagons.
 - (b) Equal to (....No.) of Class (1, 2 or 3).
 - (c) Length (on ordinary wagon basis, 21 feet over buffers).
 - (d) Class of engine and engine number.

EXAMPLES:—

38 equals 65 Class 3 equal 60 length Bunker E.2872.

35 equal 65 Class 1 equal 47 length Bunker E.2872.

58 empties (specify Pools, Common Users or Mixed) equal 65 length Bunker E.2872.

CALCULATION OF COACHING STOCK ON FREIGHT TRAINS.

The tare weight of each vehicle must be ascertained and calculated as every 10 tons equalling a Class 3 loaded wagon, e.g., a passenger coach weighing 20 tons should be counted as two Class 3 wagons.

In dealing with fractions of 10 tons, 5 tons and under to be dropped and over 5 tons to be treated as 10 tons, e.g., a passenger coach weighing 25 tons 15 cwt. should be counted as 30 tons, equalling three Class 3 wagons; similarly a passenger coach weighing 24 tons 19 cwt. should be counted as 20 tons, equalling two Class 3 wagons.

MILITARY TANKS (A.F.V's.) BY RAIL. **CALCULATION FOR FREIGHT TRAIN LOADING PURPOSES.**

Vehicle.	Dimensions.		Maximum Capacity.	Tare Weight.		Equivalent to following Class 3 traffic.

For Notes see next page.

CLASSIFICATION OF SPECIAL WAGONS, EMPTY AND LOADED.

Showing their Relationship in Weight to a Class 3 Loaded Wagon—continued.

In compiling the **WORKING LOAD**, allowance must be made for the additional length of any vehicle exceeding 21 feet over buffers in order to conform with the maximum length of train over Section which the train works. See also Clause 13, "Instructions for Calculating Loads of Freight Trains."

**—As load does not at present exceed 25 tons, loaded Tanks 1 equal 4 Class 3.

†—When load does not exceed 2 tons may be counted 2 Asmo or 2 Damo A equal 3 Class 3 loaded wagons.

*—When load does not exceed 2 tons may be counted 1 equal 1 Class 3 loaded wagon.

%—In the case of train loads of more than 50, 10-to-14-ton loaded Oil Tank Cars, the equivalent load in Class 3 exceeds 100, which is the limit laid down in the Maximum Load Tables—in such cases the trains may convey more than 50 such vehicles provided the equivalent load in Class 1 traffic does not exceed the engine load.

X—Wagons marked thus, when empty, to be calculated as one ordinary empty wagon.

If the above-mentioned wagons bear "Special" labels and/or the total weight of the load is recorded on the label they may be calculated for maximum load purposes in accordance with the following instruction, unless the vehicle is carrying approximately its maximum registered load, when it should be counted as shown in column (B).

For every 10 tons or fraction of 10 tons (over 5 and up to 10) of a load add 1 Class 3 traffic to the figure given in column (A) against the particular class of vehicle.

Example: Borail D carrying load of 16 tons, load equals 2 Class 3 traffic.

Vehicle when empty, column (A), equals 2 Class 3 traffic.

Total load to be calculated as 4 Class 3 traffic.

34	41	51	68	69	83	104	138
35	42	53	70	70	84	106	140

The above table is for the guidance of staff in computing the equivalent of mixed loads to Class 1, 2, or 3 Traffic or Empties. Where variations occur between calculations obtained by the Ready Reckoner and the Maximum Loads shown on pages 349 to 355, the latter must be strictly adhered to.

STANDARD LOADS OF PASSENGER, PARCELS, MILK AND FISH TRAINS FOR ENGINE WORKING PURPOSES.

The loads of all Passenger, Parcels, Milk and Fish Trains will be calculated on the tonnage system and the table given hereunder shows the standard loads for the various classes of engines on the different routes. The loads given in the tables represent the capacity of the engine if the standard point-to-point timing is to be maintained. On sections where gradients will permit, these loads may be exceeded with a suitable increase in the point-to-point timing, but on sections where there are steep gradients no such increase will be necessary to provide an assistant engine.

The tonnage loads shown in the "Standard Loads Table" do not apply when Auto Car services are being worked by engines of the 48XX, 54XX and 64XX classes, the authorised loads for which are specially laid down separately, in accordance with the instruction in Clause 19, page 130, of the General Appendix.

To enable guards and others to calculate the loads of trains in tons, the tare weight of the vehicle, in 24-in. figures, has been printed at both ends, at alternate corners, of all stock formed in trains coming within the category of those mentioned above. The loads of trains, calculated by the addition of these tonnage figures, must be ascertained by guards and the information given to drivers at the starting points and at any subsequent points at which vehicles are attached or detached.

In the case of a vehicle of another region not marked with the tare weight, being formed in a train, the weight of the vehicle must be counted as 10 tons for a Horse Box, Carriage Truck, or other such small vehicle, 20 tons for a four or six-wheeled passenger carrying vehicle or Brake Van, 30 tons for an eight-wheeled passenger carrying vehicle or Brake Van other than 70-ft. stock, and 40 tons for a Dining Car, Sleeping Car, or 70-ft. passenger carrying vehicle or Brake Van.

PARCELS AND FISH TRAINS.

Owing to the difference in the weights of loaded and unloaded Parcels Vans and Fish Trucks, it will be necessary in the case of Parcels and Fish Trains to add to the total of the tare weights shown on the vehicles an agreed figure representing the weight of the average load, for every loaded truck formed in the train. It has been decided that this fixed figure shall be one ton per vehicle for Parcels and 3 tons per vehicle for Fish, and, therefore, a guard, in calculating the load of his train, must multiply the number of loaded trucks by these figures and add the resulting figures to the total of the tare weights marked upon the trucks.

MILK TRAINS.—The weight of vehicles containing Milk Traffic to be computed as follows, whether the vehicles are working on Passenger, Fish, or Perishable Trains:—

Milk Tanks.	Tons.	Siphons F, G, H, and BG Vehicles.		Siphon J, and BG Vehicles.		Other Vehicles.	
		Empty	Loaded	Empty	Loaded	Tare weight.	Tare weight.
Fixed Milk Tanks (Mittas)	14	Empty	Empty	Empty	Empty	Tare weight plus 5 tons	Tare weight.
Fixed Milk Tanks (Rotanks)	18	Empty	Loaded (Full Churns)	Empty	Loaded (Full Churns)	Tare weight plus 10 tons	Tare weight plus 3 tons.

LOADING VANS CONTAINING OCEAN MAILS AND BAGGAGE.

An allowance of 5 tons per vehicle must be added to the tare weight of each loaded van of Ocean Mails and Baggage. The weight of parcels (including stores), perishable, fish and milk trains, which are run in accordance with passenger train regulations must not exceed a gross weight of 550 tons, including brate whether assisted or unassisted.

MIXED TRAINS.—Where trains are authorised to be run as "Mixed" Trains the total weight of the train is to be obtained as follows:—

Tonnage of Passenger Stock. Tare Weight of Goods Brake Van (where provided).
Tonnage of Freight Vehicles to be calculated.—Class 1 Traffic—16 tons per wagon. Class 2 Traffic—13 tons per wagon. Class 3 Traffic—10 tons per wagon. Empty (4-wheel stock) = 6 tons per wagon.

Notes.—The instructions contained herein do not in any way affect or remove the prohibition placed by the Chief Engineer on the working of certain types of engines over certain sections of line, although loadings may be given in the table for engines over portions of line which are prohibited for them.

These instructions for calculating the loads do not affect those contained in the Appendix to the Book of Rules and Regulations respecting the formation of Passenger Trains.

Empty Stock Trains must not exceed 20 eight-wheel vehicles or their equivalent in the actual total tonnage of the trains at starting points and on leaving subsequent stations at which vehicles are attached or detached.

Guards must show on their train journals the number of vehicles and the actual total tonnage of the trains at starting points and on leaving subsequent stations at which vehicles are attached or detached.

Stations will, in wiring particulars of trains, give the information as shown in the following example:

Train 120 five late; one Plymouth 34, five; Penzance 79; 3 Newquay 100; engine 4083; loading moderate. When trains are not numbered the time of train must be shown in place of numbers:

11.0 a.m. Paddington 5 late, etc.

ASSISTED TRAINS.—The load for trains assisted up inclines (except as between Pilning and Severn Tunnel Junction and Severn Tunnel Junction and Patchway, where special loads are provided) will be the maximum load for the train engine plus the maximum load for the assistant engine can haul, as shown in above table, but if there is only one Brake Van, and the assistant engine is at the rear, an additional wagon of Class 1 traffic or two empty vehicles may be conveyed in lieu of the second Brake Van for each assistant engine used.

Assisted Trains must not exceed the **working loads** unless authorised, and no train must exceed 100 wagons.

The instructions contained herein do not in any way affect or remove the prohibition placed by the Chief Engineer on the working of certain types of engines over certain sections of line, although loadings may be given in the table for engines over portions of line which are prohibited for them.

Loads of Transfer Trains between Stoke Gifford and Filton Junction worked by Group A Engines not to exceed 40 Class 1 traffic equivalent.

Trains must not be run without assistance from Filton Junction to Pilning Junction, and from Patchway to Bristol.

†—For maximum loads for Vacuum and "D" Headlamp trains, worked by 29XX, 40XX, 45XX, and 43XX Engines, see page 351.

V—Assisted by Group D Engine.

ASSISTED TRAINS.—See pages 349 and 350.

The instructions contained herein do not in any way affect or remove the prohibition placed by the Chief Engineer on the working of certain types of engines over certain sections of line, although loadings may be given in the table for engines over portions of line which are prohibited for them.

Note.—Engines of the 2-6-2T 45XX type when working stopping Freight Trains between Yatton and Wells, can only convey the same maximum loads as shown for Group A Engines, owing to the limited capacity of their water tanks. When running non-stop between these points, these engines may convey a through load of 22 Class 1 traffic or its equivalent.

Engines classified "RED" in Group A, B, and C must not work between Yatton and Witham and vice-versa.

†—Can be made up to 50 if not required to cross a train in the opposite direction at Congresbury or Cheddar respectively.

‡—When the block section is between Clifton Bridge and Portishead, trains from Ashton Meadows to Portishead and vice versa may be made up to full engine load not exceeding 60 wagons.
