NOTES

- (i) Where no separate time is shown for arrival and departure, the time indicated is the departure time.
- (ii) Figures in light type indicate the time at which a train should pass a Station or Signal Box.

RECOVERY OF TIME LOST BY FREIGHT TRAINS

When freight trains are running late, every endeavour must be made to recover time, subject to the strict observance of all speed restrictions, both permanent and temporary.

FOUR-CHARACTER TRAIN IDENTIFICATION SYSTEM

(1) GENERAL

The number inserted in each column immediately below the train title is the description allocated under the four-character train identification system and must be displayed on the front of diesel locomotives and multiple units fitted with four-character indicator equipment.

The first figure of the four-character description indicates the classification of the train but, for the time being, the former headcode letters are retained at the heads of the columns.

(2) DESTINATION INDICATIONS

Except for light engines and local freight movements the second character of the number indicates the destination area or Region as shown below.

Trains Running within Western Region

Letter	Denotes Destination in:
A	London District
B	Bristol District
C	Exeter and Plymouth Districts
T	Cardiff and Newport Districts
F	Swansea District
H	Birmingham and Gloucester Districts
J	Shrewsbury District
Z	For excursion, military and special trains running within the Western Region.

Inter-Regional Trains

Letter	Denotes Destination in:
E	Eastern Region
M	London Midland Region
N	North Eastern Region
O	Southern Region
S	Scottish Region
V	Western Region
X	For inter-Regional excursion, military and special trains.

(3) INDIVIDUAL TRAIN NUMBERS

Except for light engines and local freight movements the third and fourth figures of the number represent the individual number of the train.

(4) LIGHT ENGINES AND LOCAL FREIGHT MOVEMENTS

For light engines and local freight movements the last three characters of the number (i.e. a letter and two figures) represent a destination station, yard or Running and Maintenance depot, or, in the case of targets, control trips and bank engines, an individual description allocated from the series T00—T99.

Table "A" following sets out destination indications for light engine movements to main Running and Maintenance depots and between districts while Table "B" sets out destination indications for London District stations, yards and Running Maintenance sub-depots for use in respect of local freight and light engine movements.
