Figures in *Italics* refer to Trains which only run occasionally.

Figures in small type, thus: (7 16), indicate the time at which a Train should pass a Station.

ENGINE HEAD SIGNALS.

The letters in thick type placed in each column over the Trains are intended to indicate the particular Head Signals which that Train is to carry. Full particulars are shewn in the revised General Appendix to the book of Rules and Regulations dated April, 1910.

Goods Train Head Signals.

Guards of Regular Trains carrying "J" or "K" Head Signals, arriving at a Station towards the end of their day's work, behind their booked time, may be allowed to change them for "F" Signals upon obtaining the written authority of the person in charge of the Station, Yard or Siding to enable them to get to their home Station without taking rest, and whenever this is done the written authority mentioned is to be attached to the journal and sent to the Divisional Superintendent's Office.

TIME BOOKS AND BILLS.

Each Station Master is required to examine and compare the Time Books and Bills each issue, as far as his own Station is concerned, and to report immediately any inaccuracies he may discover to the Divisional Superintendent.

APPENDIX TO SERVICE BOOK.

Each Servant of the Company supplied with a Copy of this Book must have in his possession a Copy of No. 3 Service Book Appendix, dated February, 1908, and is responsible for obtaining same from his superior Officer.

A representation having been made to the Company that their Servants should be required to use every care to avoid running over Flocks of Hounds, which during the Hunting Season, may cross the Line, all Servants of the Company are hereby enjoined to use every care consistent with a due regard being paid to the proper working of the Line and Trains.

BALLAST TRAINS.

In the event of a Ballast Train having a long distance to run without doing work, overtaking a stopping Goods Train, if the latter can be shunted to allow the Ballast Train to proceed, it may be done, providing that the work of the stopping Goods will not be materially hindered by so doing.

A Ballast Train will run as required between Westbury and Bristol via Thingley Junction or Bradford, between Westbury and Swindon, or between Westbury, Yeovil, Dorchester, and Weymouth.

A Ballast Train will work between Reading and Basingstoke, and Reading and Devizes, between Trains as required.

A Ballast Train from Dulcot Siding (Wells Branch) will work, when required, from Witham in the direction of Weymouth or of Chippenham, returning to Dulcot via Witham.
